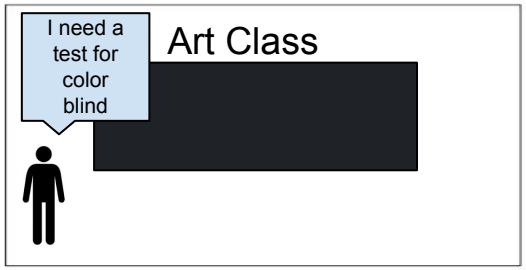
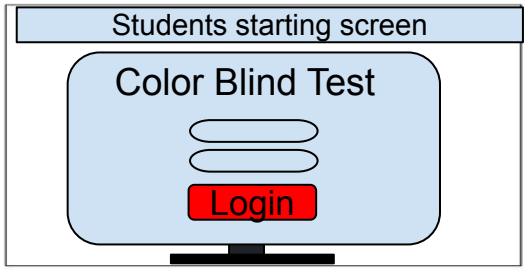
PERSONA: Joan Perez

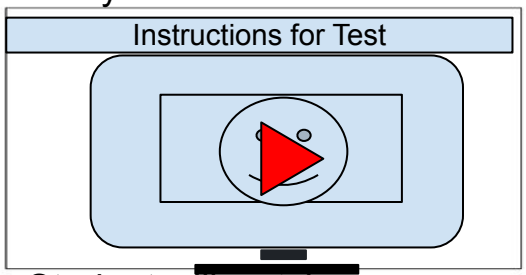
USER STORY/SCENARIO: School Art teacher who has no way of testing for students with color disability



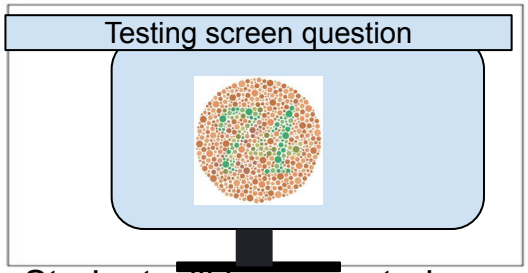
I need to test the students for who are not good with colors for color blindness



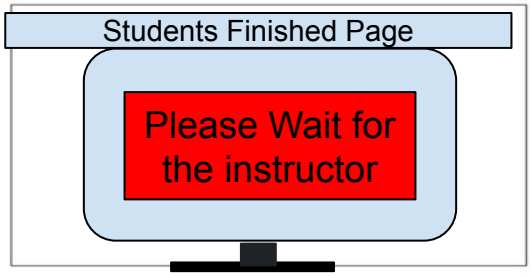
- Student logs into the test using the login provided from teacher



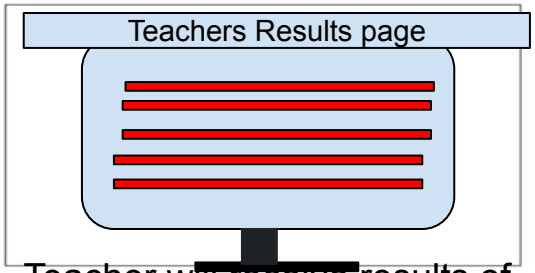
Student will watch a instruction video to know how the test works



Student will be prompted various question and asked for answers from the student



Student finished his test, and is given a waiting screen. Informing to wait for Teacher



Teacher will receive results of students test scores, and addition feedback and relay the scores
